

TRUSTED WHEN IT MATTERS

High-performance cases and racks designed for critical military and commercial applications

Tough, lightweight rotomoulded cases and racks for extreme conditions in desert, field, sea and air

Lightweight, shock-mounted 19-inch transit racks, ideal where weight, strength and portability are critical issues

Unique, super-lightweight rack solution for portable satellite equipment, conforming to IATA guidelines for checked-in baggage

CP Cases offers a worldwide design and manufacturing service for cases and racks used in the transport, operation and storage of essential equipment.

Our solutions are trusted by the professionals when they need their kit to arrive. On time. Ready for action. Guaranteed.

Find out more about our standard ranges and customised solutions at www.cpcases.com

Why us?

- 40 year track record
- Worldwide expertise in high-performance cases and racks
- Portfolio of proven products
- End-to-end service to specify, design and manufacture
- Widest range of standard, customised or bespoke solutions
- Deep understanding of chosen sectors
- Expertise in materials, technologies and processes
- Growing network of international sales offices
- Adherence to recognised quality standards

Solutions for Defence & Security

CP Cases has developed a broad range of products used successfully in military and security applications worldwide. Amazon Cases and Racks are tough, ruggedised solutions for use in extreme operating environments. ERack is an aluminium shock-mounted 19-inch rack, ideal where a lightweight and strong solution is required. Climate control options offered for Amazon and ERack; EMC-compliance is available for ERack (lids on/off). Both Amazon and ERack are accredited to MIL-STD-810F and rated IP65.

Solutions for Broadcast & Media

Amongst the first to market in 1970s with flight cases for the live music industry, CP Cases now offers the broadest range of bespoke protective operational transit cases for the broadcast professional. SatRack is our new, unique, super-lightweight transit solution for full 19-inch and half-rack equipment. Conforming to IATA regulations for checked-in baggage, SatRack is trusted by flyaway news-gathering teams the world over.

Solutions for Medical & Scientific

CP Cases has an unparalleled range of in-house skill and expertise in the design and manufacture of protective cases for medical and scientific applications. We specialise in bespoke solutions for loan and demonstration equipment, whether for short run or volume production. With experience in rotomoulded plastic, aluminium, laminated plywood, textiles and CNC foam engineering, our design team can create a solution to meet any application your product requires.

Expertise in Design & Manufacturing

CP Cases has almost 40 years' experience invested in the design and manufacture of high-performance, ruggedised protective transit cases and racks.

Our products combine our in-depth understanding of user needs with the latest technologies in raw materials and manufacturing processes. We are constantly developing and refining our product range, pioneering the most effective preventative solutions for weather, water ingress, extremes of temperature, corrosion, electromagnetic forces, rough handling and severe impact. We frequently introduce new standard sizes and dimensions within existing product lines: in the last 12 months alone we have doubled the number of Amazon Cases and Racks available.

Increasingly we can meet your individual requirements by customising one of our standard products. This ensures that we can deliver a cost-effective solution, to strict deadlines, with absolute confidence in the robust performance of a tried and tested solution.
